Background Information

Ampcon Consulting Electrical Engineers is a service orientated Consulting Engineering Firm, equipped to handle projects over the full spectrum of electrical engineering work.

Ampcon Consulting Electrical Engineers has a registered office in Rustenburg, Northwest. The company has a total workforce of eight personnel, some registered professionals, registered with the Engineering Council of South Africa.

The company is further in association with other specialist Electrical and Mechanical Consultants, complementing the technical abilities of all shareholders, and ensuring better competitiveness.

Our Goals

The team is committed to:

- Satisfy the needs of each client and serve them with honesty and integrity.
- Involvement in community upliftment projects and capacity building in disadvantaged communities.
- Meet the demands of society and fulfill its needs.
- Offer a competent and competitive service of exceptional quality.
- Add value to our projects through quality of service, effective designs and professionalism.

Ampcon Consulting Electrical Engineers strive to conceive, implement and complete projects in order to fulfill the needs of the client and community and to exceed their expectations through quality and professionalism.

The company keeps in touch with the latest technology to ensure innovative, cost effective and appropriate engineering solutions.

The company further serves its clients with the highest levels of integrity and impartiality.

We further market through a quality product, and strive to establish long term relationships with all our clients.

Mission Statement

Empowerment Policy

Ampcon Consulting Engineers offers equal opportunities to all employees irrespective of race, colour, gender or creed. The company further supports equal opportunities and the role it must fulfill in the development of human resources.

The company supports the reconstruction and development programme. We participate in RDP projects as Consulting Engineers and also engage in the development of people from previously disadvantaged communities.

The firm further aim to get involved in community based projects; structuring projects in such a way that job creation takes place by using labour based construction methods and thereby creating opportunities for the training of contractors, artisans and maintenance personnel.
